| Credit Identifier | BC-2024-003 |
| Issuing Organization | MobiCycle |
| Project Name | Eco-Friendly Retail Initiatives |
| Credit Type | Urban Green Spaces |
| Project Description | Implementing green infrastructure in retail spaces to support urban biodiversity |
| Location | Urban retail centers |
| Ecosystem Type | Urban |
| Start Date | March 1, 202X |
| Project Duration | 5 years |
| Biodiversity Goals | Increase urban green spaces by 50 hectares, support pollinator populations |
| Quantifiable Benefits | XX hectares of green roofs and walls, YY% increase in pollinator populations. |
| Additionality | Greening initiatives beyond current building codes |
| Permanence | Permanent eco-friendly infrastructure |
| Leakage | Mitigation of negative impacts in surrounding areas |
| Monitoring Plan | Regular monitoring of green roofs, pollinator gardens, and light pollution |
| Verification Reports | Verified by |
| Compliance with Standards | MobiCycle Standards |
| Credit Value | \$X per credit |
